Stakeholder engagement process within SMART

1. Define vision and key principles of project
2. Research domain is shaped by core competencies and research areas of researchers
3. Identify, "map", and contact stakeholders
4. Engage with stakeholders
5. Framing and prioritizing research questions
   - Data collection
   - Data analysis
   - Interpretation of analyzed data
6. Develop scenarios for decision-making at multiple governance levels and spatial scales
7. Dialogue and communication with all relevant actors & groups
8. Generation of academic papers
9. Generation of policy briefs and reports
10. Support of decision making by stakeholders
